

# Nicholaus Suprpto

🏠 Waterloo, ON, CA ✉️ nsuprpt@uwaterloo.ca 📞 (437) 986-7810 🌐 📧 📱

## Education

### University of Waterloo

2020–2025

Candidate for Bachelor of Computer Science, Data Science Major - 3.94 GPA

Relevant Coursework: Object-Oriented Programming, Data Structures and Data Management, Data Analysis

## Skills

**Languages:** Python, C++, C, Javascript, Java, SQL, R, HTML/CSS

**Tech Stack:** Git, Docker, Pandas, Matplotlib, Seaborn, TensorFlow, Vue, Django, Flask, MySQL, Firebase

## Experience

### FarmLink Marketing Solutions

Winnipeg, MB–Remote

Software Developer Intern

May 2022 - Aug 2022

- Developed user interfaces using Vuetify in client-facing web application while practicing pair programming
- Effectively refactored front-end components into generic components to reduce code complexity
- Configured Vite and front-end code splitting that reduces load times by 26% and reduces bundle size by 72%
- Improved Jest unit test coverage to 80% and maintained Selenium automation tests
- Optimized Django ORM queries of 3 main features to reduce API response times to a standardized response time
- Integrated Github Actions and Microsoft Teams to provide automatic updates of deployments

### Paramount Commerce

Toronto, ON–Remote

Merchant Integrations Analyst Intern

Sept 2021 - Dec 2021

- Certified merchant integrations in the staging environment to meet compliance requirements
- Utilized SQL queries to gather transaction data and extract information for merchant integrations
- Documented request parameter constraints and errors for all internal products to save client time
- Assisted the company-wide Salesforce migration from Jira and created new Reports and Dashboards in Salesforce

## Projects

### Spotify Data Visualization 📊

- Designed rich data visualization to model personal Spotify streaming habits with Matplotlib and Seaborn
- Collected historical data and audio analysis data from Spotify API and worked on data cleaning and ensured data consistency using Pandas and Numpy

### Binary Image Classifier 📷

- Built binary image classification model based on EfficientNetB3 to classify images into two distinct groups during week-long hackathon event, CxC Summit hosted by UW CSC and UW DSC
- Increased dataset by data augmentation and fine-tuned the model with manual tuning to reach 93% accuracy

### WLP4 Compiler 📄

- Built a compiler for WLP4, a strict subset of the C++ language, that produces ARM code of the given file with some optimization such as constant folding.
- Implemented Simplified Maximal Munch scanning algorithm and Bottom Up parsing algorithm

### Covid Tracking Web Application 📍

- Built a contact-tracing web application using Flask web framework that allows users to add previously visited locations using Google Maps API and alert users if there has been contact with Covid patients
- Utilized Heroku Postgres Database to store web data and used SQLAlchemy ORM to retrieve data

## Achievements

CxC Summit ML Edition - Aipaca Challenge 1st Place	2022
CxC Summit ML Edition - Watonomous Challenge 1st Place	2022
Oracle Certified Associate, Java SE 8 Programmer	2021
University of Waterloo Merit Scholarship	2021
