Chubb Ltd.
Toronto, ON

Dear Recruiter,

I am submitting my candidature for an Applied AI Co-op position at Chubb. My passion is to work with extremely talented people and collaborate to make an immediate impact. I spent my time in university learning Computer Science and Mathematics, and I am keen to continue developing my career in the field of data science. I have always been a numbers person, and I enjoy manipulating data and finding correlations between them to solve immediate problems. Working for Chubb will expand my ability to solve real world problems with data.

In my previous internship at Paramount Commerce, I worked closely with the database to help solve issues in merchant integrations and query data using SQL queries for reports. I learned how to transform information needed in a problem into queries and creating effective queries to gather data required to solve the problem. I also built KPI dashboards in Salesforce during my internship which is still being used in daily huddles. On some of my personal projects, I also learned about database creation and how to maintain it. I hope that my experience in SQL, R, and Python combined with my knowledge of data visualization and management, would make me a great addition to your team.

I would love the opportunity discuss the Applied AI Co-op position and how my skills could help. I truly hope to make a solid contribution at Chubb. I appreciate your time and consideration, and I look forward to speaking with you.

Sincerely,
Nicholaus Suprpto
