TD Bank Group – Technology & Risk Management
Toronto, ON

Dear Recruiter,

I am submitting my candidature for a Data Management and Reporting Co-op at TD Bank Group. My passion is to work with extremely talented people and collaborate to make an immediate impact. I spent my time in university learning Computer Science and Mathematics, and I am keen to continue developing my career in the field of data analysis. I have always been a numbers person, and I enjoy manipulating data and finding correlations between them to solve immediate problems. Working for TD Bank Group will expand my ability to solve real world problems with data.

In my previous internship at Paramount Commerce, I worked closely with the database to help solve issues in merchant integrations and query data using SQL queries for reports. I learned how to transform information needed in a problem into queries and creating effective queries to gather data required to solve the problem. On some of my personal projects, I also learned about creating databases and how to maintain it. I hope that my experience in SQL, Excel, R, and Python combined with my knowledge of data visualization and management, would make me a great addition to your team.

I would love the opportunity discuss the Data Management and Reporting Co-op position and how my skills could help. I truly hope to make a solid contribution at TD Bank Group. I appreciate your time and consideration, and I look forward to speaking with you.

Sincerely,
Nicholaus Suprpto
