# Nicholaus Suprapto 20871083 3A Data Science, Honours Co-operative Program

Work Term	Employer		Evaluation
Sep - Dec 2021	Paramount Commerce	E	EXCELLENT
	Divisional Office		
	Toronto Ontario Canada		
	Integrations Analyst		
May - Aug 2022	FarmLink Marketing Solutions	I	EXCELLENT
	Head Office		
	Winnipeg Manitoba Canada		
	Jr. Software Developer		
Jan - Apr 2023	State Street Corporation		
	Global Technology Services		
	Toronto Ontario Canada		
	Data Analyst Intern		

#### Planned Future Work Term(s)

Jan - Apr 2023

Sep - Dec 2023

May - Aug 2024

Sep - Dec 2024

#### **Nicholaus Suprapto**

🆄 Waterloo, ON, CA 👎 nsuprapt@uwaterloo.ca 🕮 (437) 986-7810 🖸 🛅 🤱

#### Education

#### University of Waterloo

2020-2025

Candidate for Bachelor of Computer Science, Data Science Major - 3.94 GPA

Relevant Coursework: Object-Oriented Programming, Data Structures and Data Management, Data Analysis

#### Skills

**Languages:** C++, C, Python, Javascript, Java, SQL, R, HTML/CSS

Tech Stack: Git, Docker, Pandas, TensorFlow, Vue, Jest, Django, PostgreSQL, MySQL, Firebase

#### **Experience**

#### FarmLink Marketing Solutions

Winnipeg, MB-Remote

May 2022 - Aug 2022

Software Developer Intern

- Developed user interfaces using Vuetify in client-facing web application while practicing pair programming
- Effectively refactored front-end components into generic components to reduce code complexity
- Configured Vite and front-end code splitting that reduces load times by 26% and reduces bundle size by 72%
- Improved front-end test coverage to 80% by creating unit tests using Jest
- Optimized Django ORM queries of 3 main features to reduce API response times to a standardized response time
- Integrated Github Actions and Microsoft Teams to provide automatic updates of deployments

Paramount Commerce Toronto, ON–Remote

Merchant Integrations Analyst Intern

Sept 2021 - Dec 2021

- Certified merchant integrations in the staging environment to meet compliance requirements
- Utilized SQL queries to gather transaction data and extract information for merchant integrations
- Documented request parameter constraints and errors for all internal products to save client time
- Researched and recommended mobile emulator tools to simplify the current automated and live testing practices
- Assisted the company-wide Salesforce migration from Jira and created new Reports and Dashboards in Salesforce

#### **Projects**

#### Spotify Data Visualization

- Designed rich data visualization to model personal Spotify streaming habits with Matplotlib and Seaborn
- Collected historical data and audio analysis data from Spotify API and worked on data cleaning and ensured data consistency using Pandas and Numpy

#### 

- Built binary image classification model based on EfficientNetB3 to classify images into two distinct groups during week-long hackathon event, CxC Summit hosted by UW CSC and UW DSC
- Increased dataset by data augmentation and fine-tuned the model with manual tuning to reach 93% accuracy

#### WLP4 Compiler

- Built a compiler for WLP4, a strict subset of the C++ language, that produces ARM code of the given file with some optimization such as constant folding.
- Implemented Simplified Maximal Munch scanning algorithm and Bottom Up parsing algorithm

#### **Achievements**

CxC Summit ML Edition - Aipaca Challenge 1st Place	2022
CxC Summit ML Edition - Watonomous Challenge 1st Place	2022
Oracle Certified Associate, Java SE 8 Programmer	2021
University of Waterloo Merit Scholarship	2021
