Nicholaus Suprapto

🏠 Waterloo, ON, CA 📫 nsuprapt@uwaterloo.ca ☎ (437) 986-7810 🐙 💼 🧑‍💻

Education

University of Waterloo — 2020–2025
Candidate for Bachelor of Computer Science, Data Science Major - 3.94 GPA
Relevant Coursework: Object-Oriented Programming, Data Structures and Data Management, Data Analysis

Skills

Languages: Python, C++, C, Javascript, Java, SQL, R, HTML/CSS
Tech Stack: Git, Docker, Vue, Vuetify, Jest, Selenium, Django, Flask, PostgreSQL, MySQL, Firebase

Experience

FarmLink Marketing Solutions — **Winnipeg, MB–Remote**
Software Developer Intern — May 2022 - Aug 2022
- Developed user interfaces using Vuetify in client-facing web application while practicing pair programming
- Effectively refactored front-end components into generic components to reduce code complexity
- Configured Vite and front-end code splitting that reduces load times by 26% and reduces bundle size by 72%
- Improved Jest unit test coverage to 80% and maintained Selenium automation tests
- Optimized Django ORM queries of 3 main features to reduce API response times to a standardized response time
- Integrated Github Actions and Microsoft Teams to provide automatic updates of deployments

Paramount Commerce — **Toronto, ON–Remote**
Merchant Integrations Analyst Intern — Sept 2021 - Dec 2021
- Certified merchant integrations in the staging environment to meet compliance requirements
- Utilized SQL queries to gather transaction data and extract information for merchant integrations
- Documented request parameter constraints and errors for all internal products to save client time
- Assisted the company-wide Salesforce migration from Jira and created new Reports and Dashboards in Salesforce

Projects

Binary Image Classifier 🐙
- Built binary image classification model based on EfficientNetB3 to classify images into two distinct groups during week-long hackathon event, CxC Summit hosted by UW CSC and UW DSC
- Increased dataset by data augmentation and fine-tuned the model with manual tuning to reach 93% accuracy

WLP4 Compiler 🐙
- Built a compiler for WLP4, a strict subset of the C++ language, that produces ARM code of the given file with some optimization such as constant folding.
- Implemented Simplified Maximal Munch scanning algorithm and Bottom Up parsing algorithm

Biquadris 🐙
- Collaborated in creating Biquadris, a Latinization of the game Tetris, using C++ with a graphical interface for users built using the X11 library.
- Implemented the MVC architecture, Observer and Decorator design pattern throughout the code design

Covid Tracking Web Application 🐙
- Built a contact-tracing web application using Flask web framework that allows users to add previously visited locations using Google Maps API and alert users if there has been contact with Covid patients
- Utilized Heroku Postgres Database to store web data and used SQLAlchemy ORM to retrieve data

Achievements

CxC Summit ML Edition - Aipaca Challenge 1st Place	2022
CxC Summit ML Edition - Watonomous Challenge 1st Place	2022
Oracle Certified Associate, Java SE 8 Programmer	2021
University of Waterloo Merit Scholarship	2021
