RouteThis Inc.
Kitchener, ON

Dear Recruiter,

I am submitting my candidature for a Full Stack Developer Co-op position at RouteThis. My passion is to work with extremely talented people and collaborate to make an immediate impact. I spent my time in university learning Computer Science and Mathematics, and I am keen to continue developing my career in the field of web development. I enjoy being challenged and engaging with projects that require me to work outside my comfort zone, as continuing to learn new languages and development techniques. Working for RouteThis will expand my ability to create viable web applications.

When working on my projects, I learned a lot about collaboration and software design. I have created web applications using both Javascript and Python frameworks. While working on my projects, I specialize in working on the backend. I love the intricacies of how web applications work behind the curtains, how databases are connected and different implementations of user interfaces. Working together using Git helped me understand the functionality of version control and how it helps multiple people working together. Furthermore, I am able to practice writing effective and clean code which allows collaboration with other team members. I am keen to further learn the applications of different development techniques in the industry through this internship.

I would love the opportunity discuss the Full Stack Developer Co-op position and how my skills could help. I truly hope to make a solid contribution at RouteThis. I appreciate your time and consideration, and I look forward to speaking with you.

Sincerely,
Nicholaus Suprapto
